The *Journal of the History of the Neurosciences: Basic and Clinical Aspects*, the official organ of the society, is published by Taylor & Francis (formerly by Swets & Zeitlinger). Now in its 16th year, the Journal provides a forum for investigations in the field of neuroscience history, as broadly defined, including the history of basic, clinical, and behavioral neurosciences, ancient and non-western topics, and significant individuals, events, and technical advances. ISHN is a focal point for those interested in neuroscience history and offers, through its journal and annual meeting, opportunities to contribute to this rapidly growing field.
